Mode	Offline.
Details of Resource person (name, designation, institution)	

Key Participants	Students of B.Sc. Human science and M.Sc. Clinical Psychology
Remarkable outcomes/ key take-away messages (max. three)	<ul style="list-style-type: none"> ● The school provides a variety of methods and services for intellectually disabled children. To involve every student in the learning process, this included smaller classes, individualised instruction, one-on-one support, self-contained classrooms, resource rooms, and learning aids. ● Every student was given personalized treatment/every student was personally attended. ● They don't approach education in a "one-size-fits-all" manner. Instead, they provide specialised instruction to address the particular needs and circumstances of each student. ● Teachers not only deal with children but also their parents and it's something that is challenging yet they do it flawlessly.
Details of participants	
Total Number	31
MSc clinical psychology students	8
SY BSc students	21
	Faculty members: 2 students: 29
