

Hands on Training on

Gas Chromatography (G.C.) instrument

What is G. C.?

Gas Chromatography is a technique used for separation of volatile materials. It can analyze multi component mixtures such as essential oils, volatile derivatives of non-volatile compounds like amino acids, steroids, pesticides etc. This technique has wide applications in chemical & pharmaceutical industry and now a days is used quite frequently not only in large factories but also even in medium scale companies. As such there is a growing demand of chemists who have working experience on GC.

Why hands on training on G.C.?

There are very few centers available, which can provide training to students & aspiring chemists. In most of the cases it is **only demonstration** of the technique without hands – on experience. The topic on GC is included in T. Y. B. Sc. (Chemistry) syllabus of Mumbai University. But in almost all colleges GC is not available even for demonstration leave alone working on it. Even Post – Graduate students & Research students have limited access to the instrument & rarely get the opportunity to work on it; although GC has become a common technique used in industry.

Considering all these aspects, we at "VPM's Advanced Study Centre" have started a short term Training Programme on G.C.

Important Features:

- Hands on Training on Thermo Scientific - Chemito GC - 8610 to each candidate
- Training Certificate provided
- Pleasant fully Air Conditioned laboratory
- Affordable Fees
- Special Discount for students of B. N. Bandodkar College of Science, Thane

Contact Details:

VPM's ADVANCED STUDY CENTRE

Gr. Floor. Bldg. No.6, Thane College Campus,
Nr. CIDCO Bus Stop, Chendani, Thane (W) 400 601.
