About Conference

The Departments of Mathematics and Statistics are organizing National level conference on "Applied Mathematics and Statistics" on January 13 and January 14, 2023.

Mathematics and Statistics plays major role in engineering, physical, biological, economical, medical, computer science and real-world applications. It is ubiquitous in everyday world of science and technology.

National Conference on "Applied Mathematics and Statistics" aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences on all aspects of Applied Mathematics and Statistics. It is an excellent forum for academicians and researchers to present their research and to exchange ideas on recent developments in Mathematics and Statistics.

This conference will provide new directions through several invited talks by experts covering problems of current interest and important applications. It also provides an interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent innovations and trends in applied fields of Mathematics and Statistics.

The main objective of the conference is to facilitate the researchers stay abreast with recent developments in various applications of Mathematics and Statistics.

Call for Papers

The organizers invite original and unpublished research papers from academia, industry experts and students/research scholars to present their work through oral presentations in the broad areas of the major themes outlined. There will be a review on the abstracts by experts and selection of the paper based on the recommendations of the expert committee. The authors of selected abstracts would be asked to submit their full length paper and present their study during the conference. The accepted and presented papers will be peer reviewed and published in the conference volume/proceedings.

Themes of the Conference

- Financial Mathematics
- Cryptography
- Mathematical Biology
- Game Theory
- Mathematics of Engineering
- Mathematical Physics
- Actuarial Science
- Fuzzy Mathematics
- Bioinformatics
- Number Theory
- Differential Equations
- Population Theory
